DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to method of identifying homologous recombination in plant cells, classified in class 800, subclass 278.
 - II. Claims 13-19, drawn to isolated nucleic acid molecule comprising nucleic acid fusion sequence wherein the nucleic acid lacks expression sequences, classified in class 536, subclass 23.1.
 - III. Claims 20-24, drawn to plant cell comprising a heterologous nucleic acid fusion sequence wherein the heterologous nucleic acid is linked to endogenous promoter, classified in class 435, subclass 419.
 - IV. Claims 25-31, drawn to plant cell comprising nucleic acid molecule, classified in class 435, subclass 410.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of Group II can be made by utilization of baculovirus expression system.

Art Unit: 1649

Inventions of Groups I and III-IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of Group III or IV wherein the nucleic acid sequence can be isolated by hybridization technique and the plants of Groups III and IV can be made by a heterologous recombination.

Inventions of Groups II and III-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group II does not require the inventions of Group III-IV.

Inventions of Groups III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group III does not require the employment of the endogenous promoter.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1649

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
